Objective

Aspiring Full Stack Developer with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js), HTML, CSS, JavaScript, and SQL. Skilled in building responsive web applications and performing CRUD operations. Seeking an entry-level Full Stack Developer role to contribute to real-world web development projects.

Technical Skills

- **Languages:** C, C++, Python (Basic), JavaScript
- **Frontend:** HTML, CSS, Bootstrap, React.js, Redux Toolkit, Vite
- **Backend:** Node.js, Express.js, JWT Authentication, RESTful APIs
- **Database:** MongoDB, Mongoose, SQL
- **Tools & Platforms:** GitHub, Postman, VS Code, Razorpay, Vercel
- **Other:** Basic SEO, Prompt Engineering (ChatGPT, Claude, Gemini, GitHub Copilot)

Projects

GlowEssence – Multi-Vendor E-Commerce Platform

MERN Stack

- Collaborated in a 4-member team to build a full-stack e-commerce platform for a clean beauty brand using React 19, Redux Toolkit, Node.js, Express, and MongoDB, supporting three distinct roles: shopper, seller, and admin.
- Implemented JWT-based authentication, bcrypt password hashing, and role-based middleware, restricting sellers to managing only their own products with secure access control across all API routes.
- Built shopper features (live filtering, sorting, cart/wishlist, multi-item checkout with real Razorpay payments) plus seller and admin dashboards with sales/platform analytics.

React Blog Application

React.js Project

- Built a full-featured blog application using React.js with complete CRUD (Create, Read, Update, Delete) functionality for blog posts.
- Used JSON Server to simulate a REST API backend, enabling realistic data handling and asynchronous state management.
- Implemented component-based architecture and React Hooks for efficient state management and reusable UI components.

Flipkart Clone

Node.js Project

- Developed a full-stack e-commerce clone of Flipkart using the MERN stack (MongoDB, Express.js, React.js, Node.js) with product listings and cart functionality.
- Designed MongoDB schemas for product and user data, and built RESTful Express.js APIs to handle backend logic and frontend integration.
